ARM ASSEMBLY GUIDE

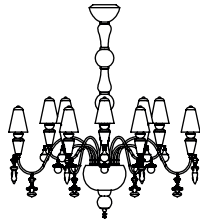

for each chandelier size

Size "S"

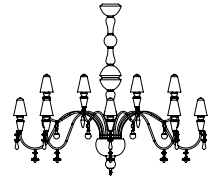

Size "M"

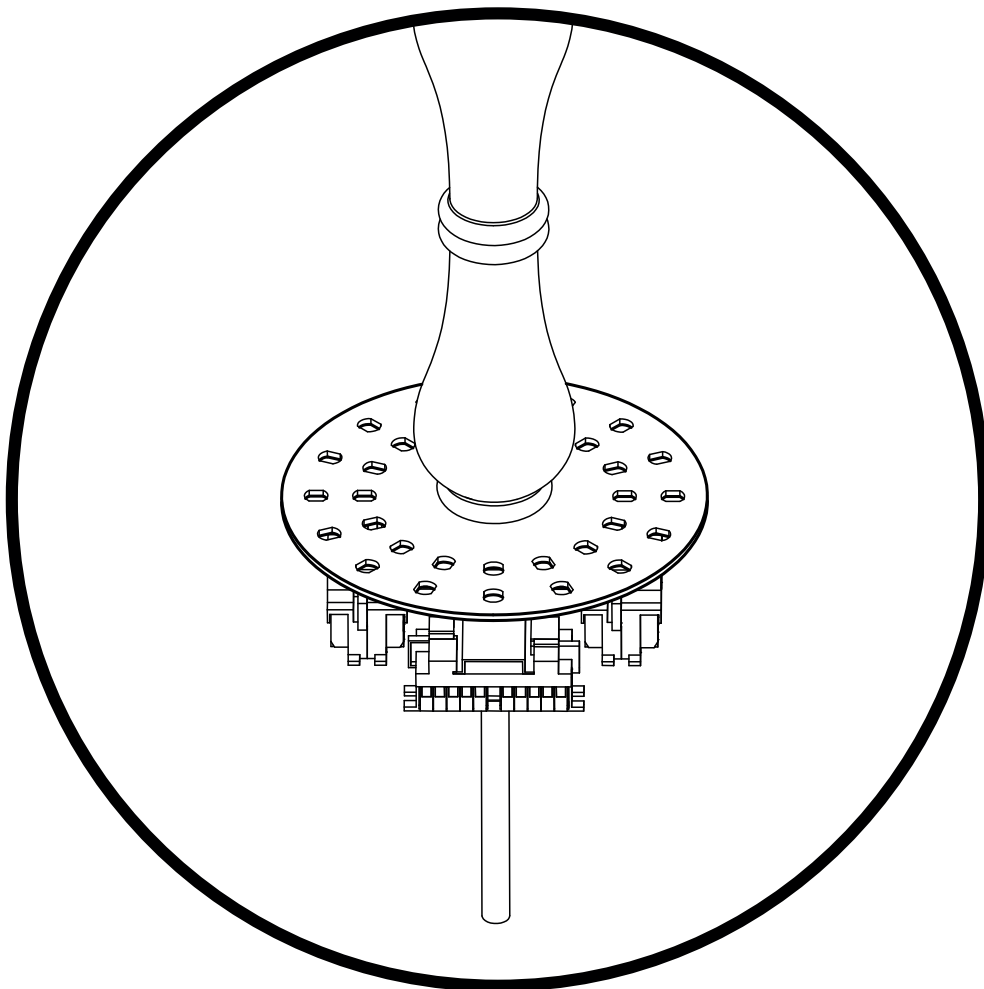

Size "Mp"

Size "L"

Size "Lp"

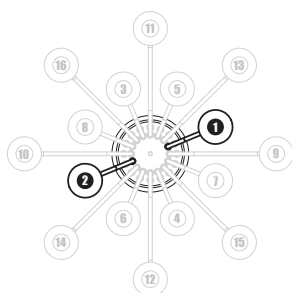

Arm assembly sequence is essential to maintain the lamp's shaft as vertical as possible during the building.

Always start installing the arms belonging to the inner array of holes, then follow with the ones placed in the outer array.

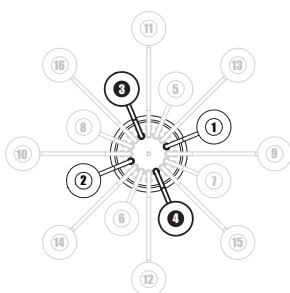

Placing several adjacent arms at one time will cause a big unbalance, leaning the hole lamp and applying tension forces in the shaft that could break it. The bigger the chandelier, the more important this point is.

Always work in opposite arm pairs.

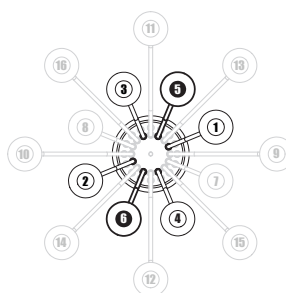

Please, take the inner array arm building below as an example:
(outer array would follow in an equivalent way)

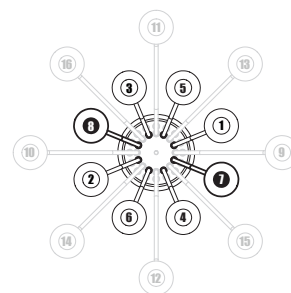

STEP 1

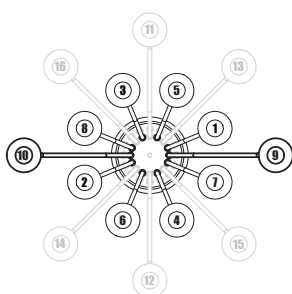

STEP 2

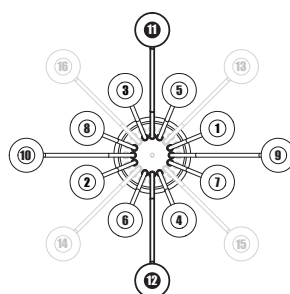

STEP 3

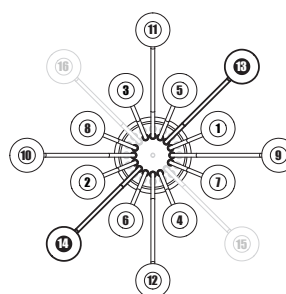

STEP 4

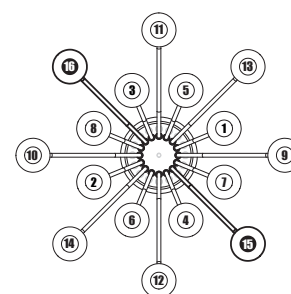

STEP 5

STEP 6

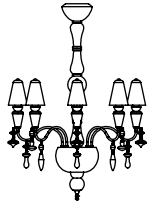

STEP 7

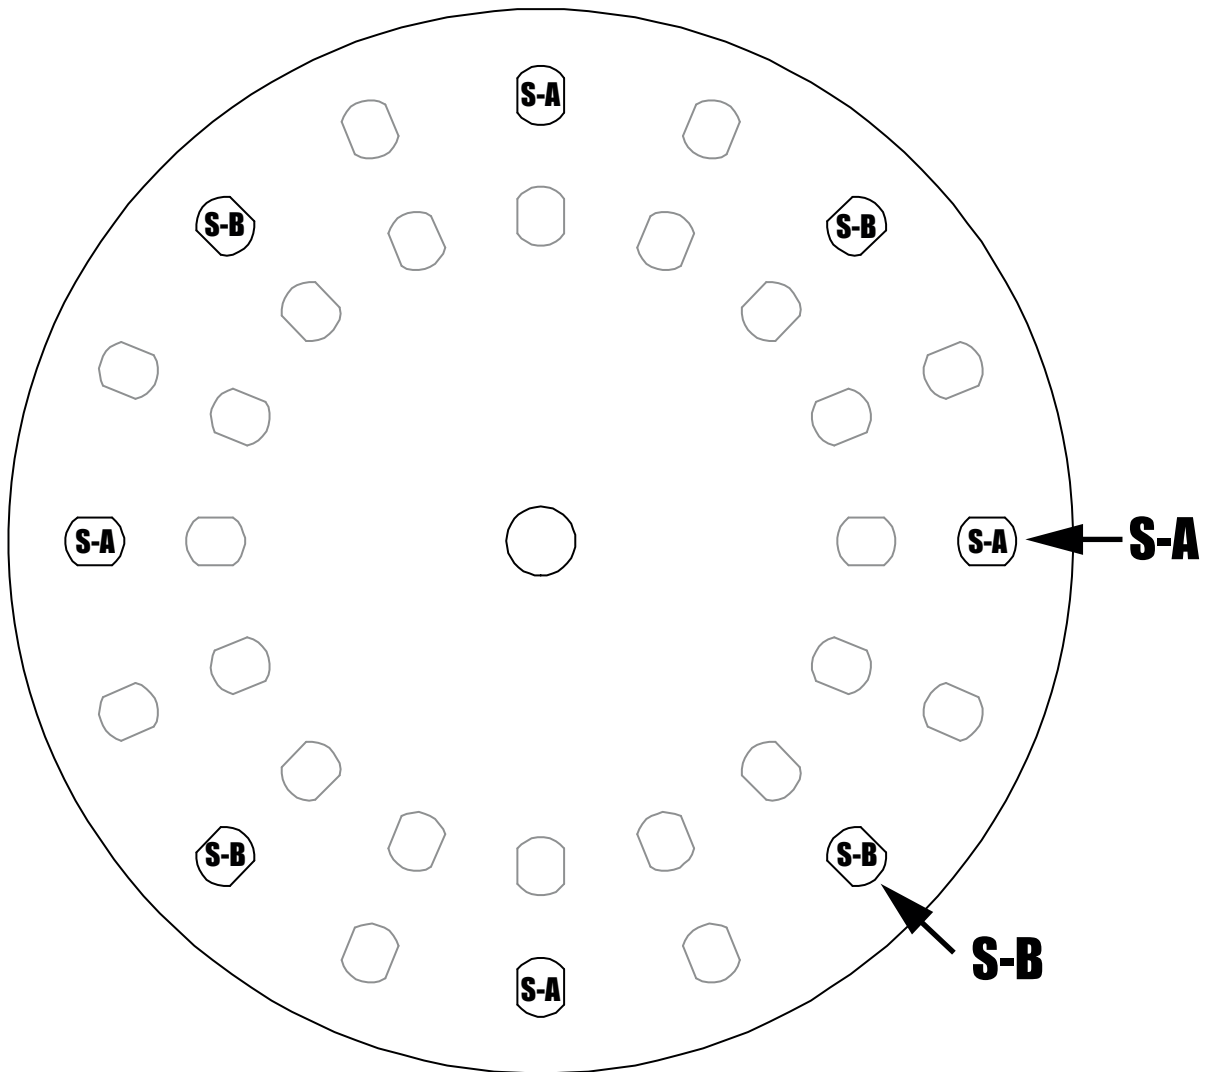

STEP 8

Secure the arms into the distributor with a wrenk, aplying just the required torque to leave them straight. Too much torque into the nuts could cross-thread the arm ends.

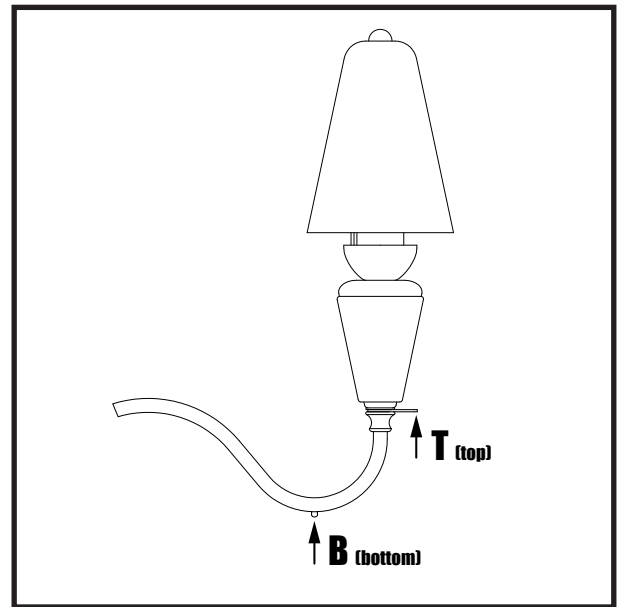

Size "S"

Each box is labeled with the arm size it contains.

Once the box is opened, first install the arm, then hang the accesories belonging to it, according to the table below:

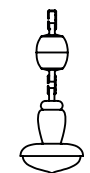

B

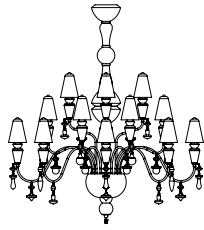

T

Arm **S-A**

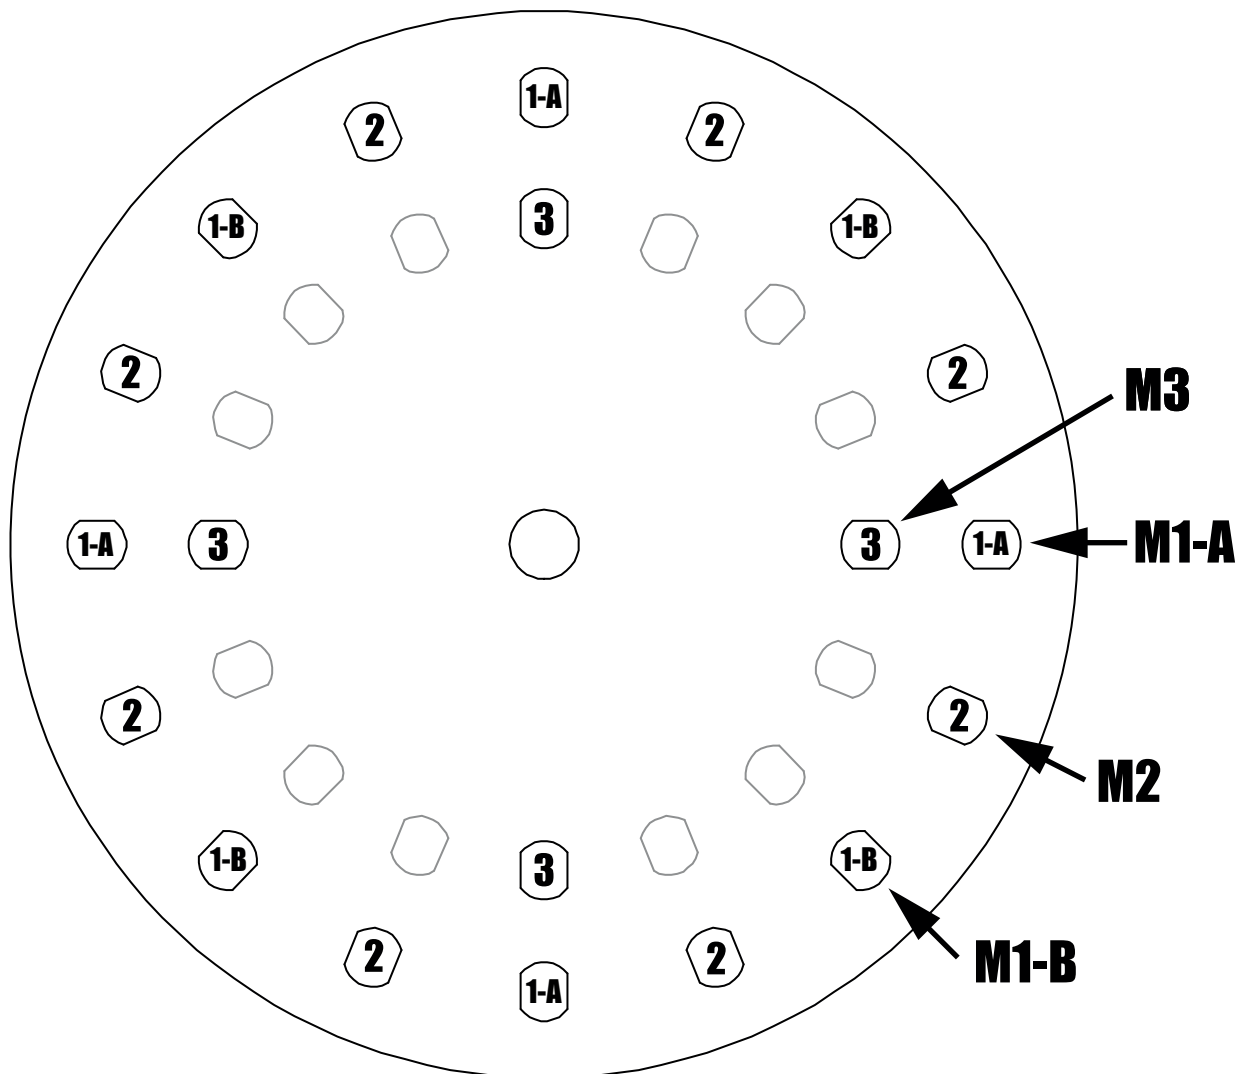

Arm **S-B**

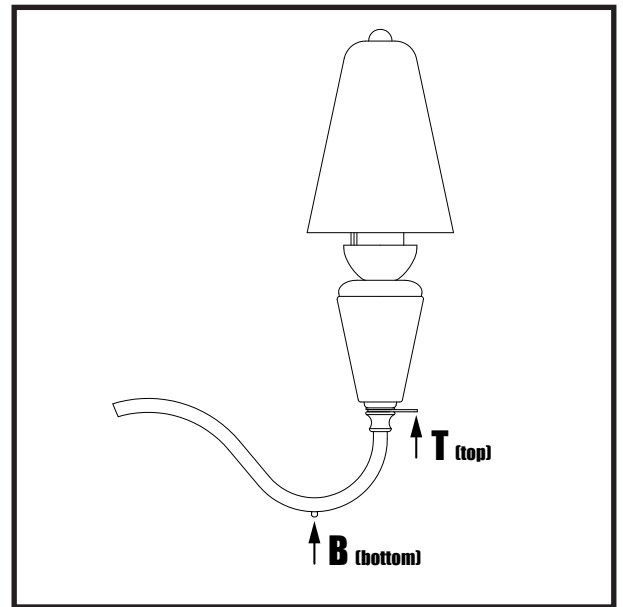

Size "M" 20L

Each box is labeled with the arm size it contains.

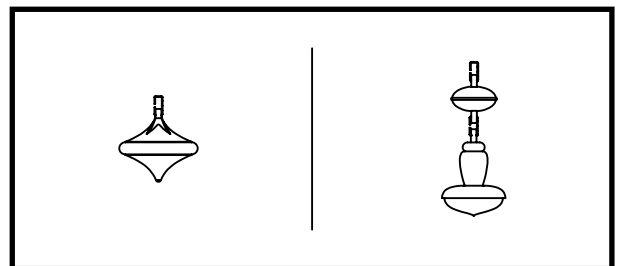

Once the box is opened, first install the arm, then hang the accesories belonging to it, according to the table below:

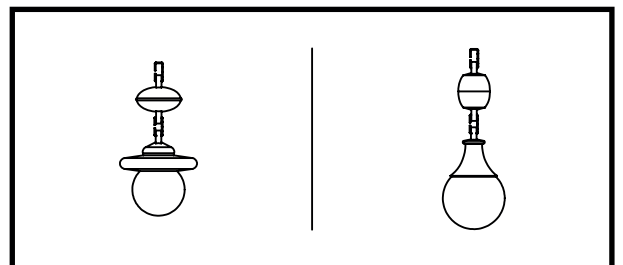

B

T

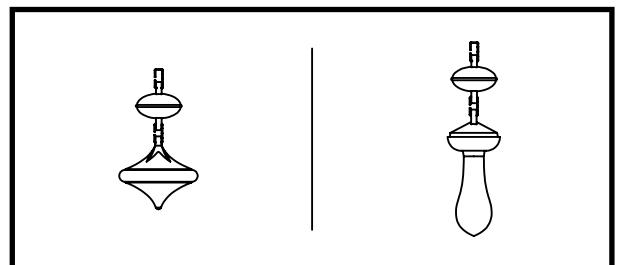

Arm **M3**

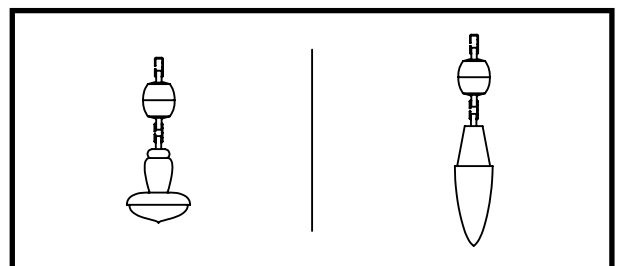

Arm **M2**

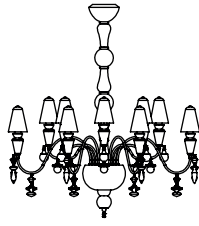

Arm **M1-A**

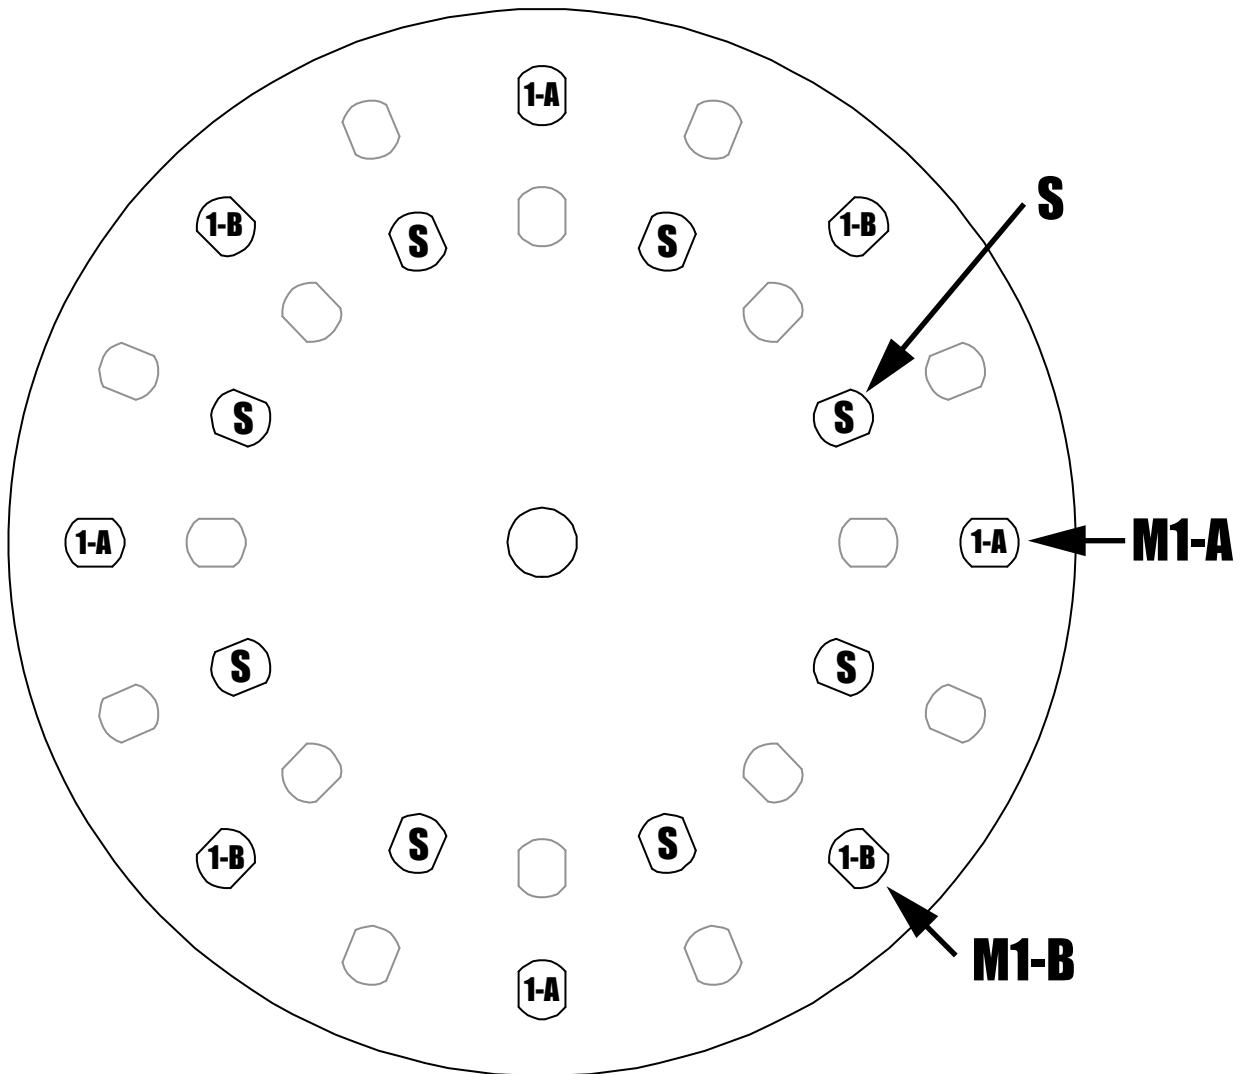

Arm **M1-B**

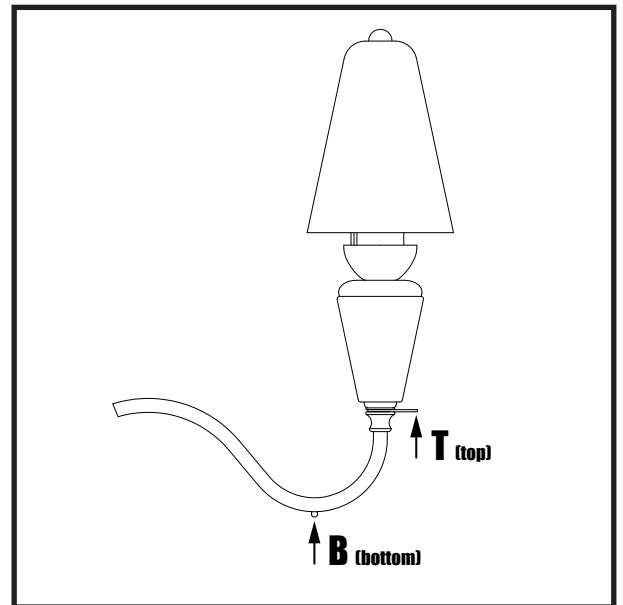

Size "M" 16L

Each box is labeled with the arm size it contains.

Once the box is opened, first install the arm, then hang the accesories belonging to it, according to the table below:

B

T

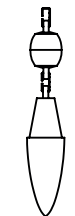

Arm **S**

Arm **M1-A**

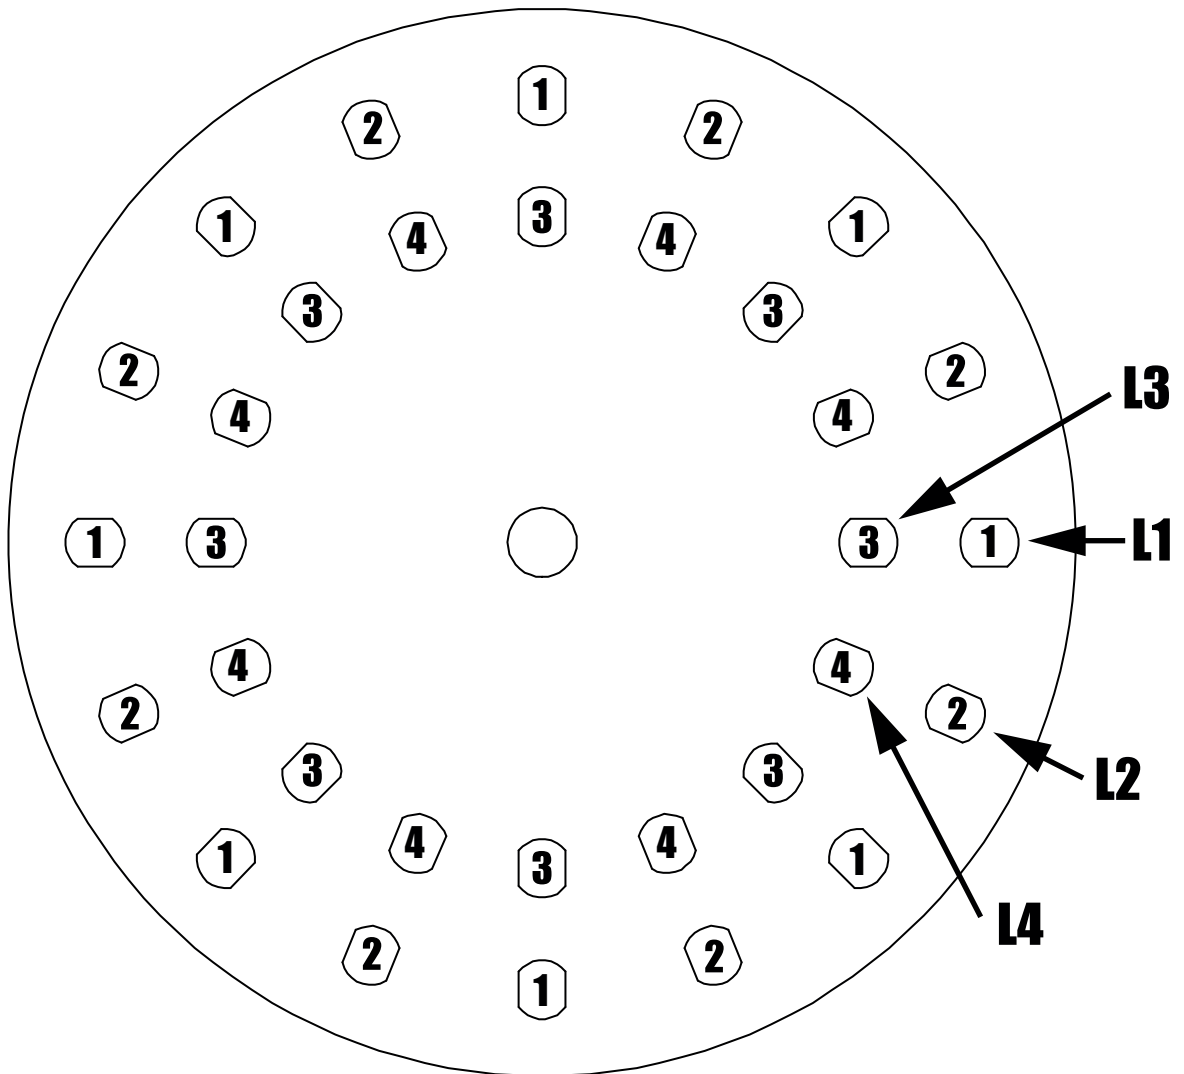

Arm **M1-B**

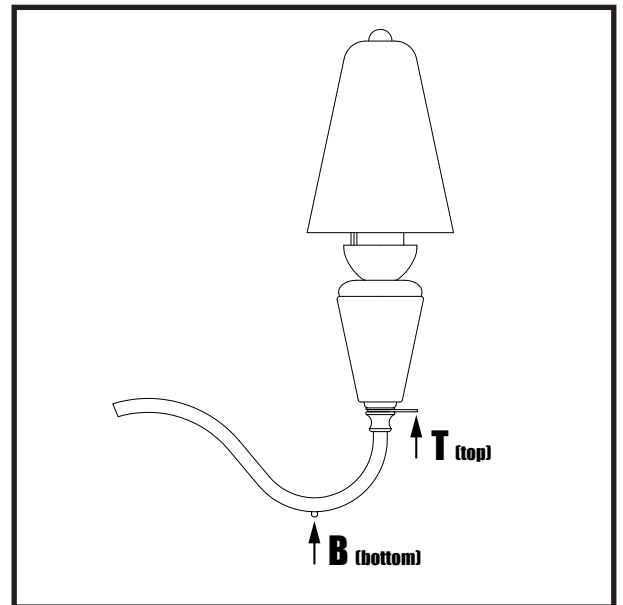

Size "L" 32L

Each box is labeled with the arm size it contains.

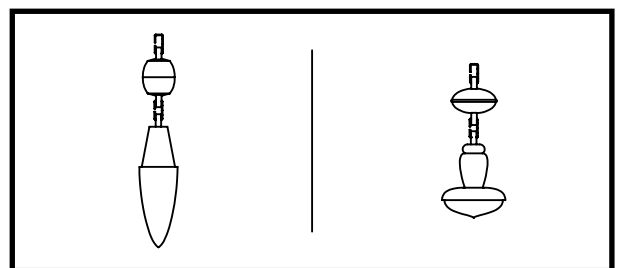

Once the box is opened, first install the arm, then hang the accesories belonging to it, according to the table below:

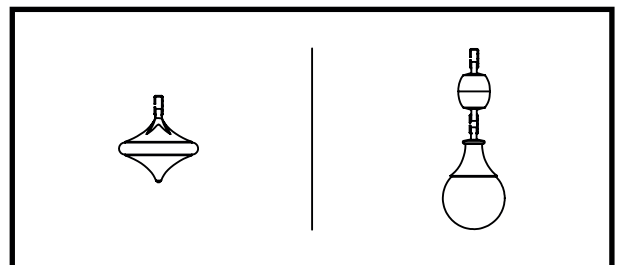

B

T

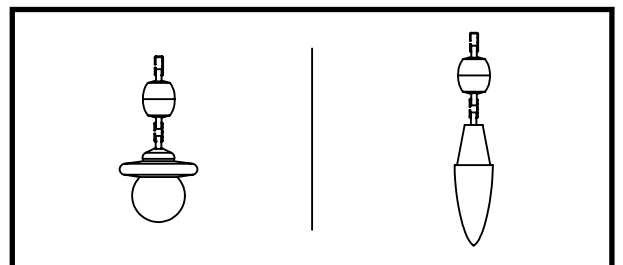

Arm **L4**

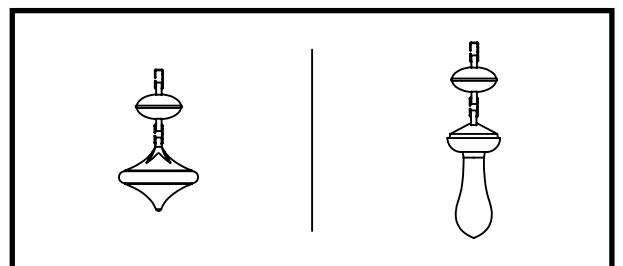

Arm **L3**

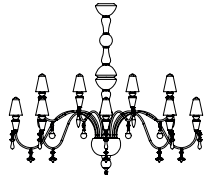

Arm **L2**

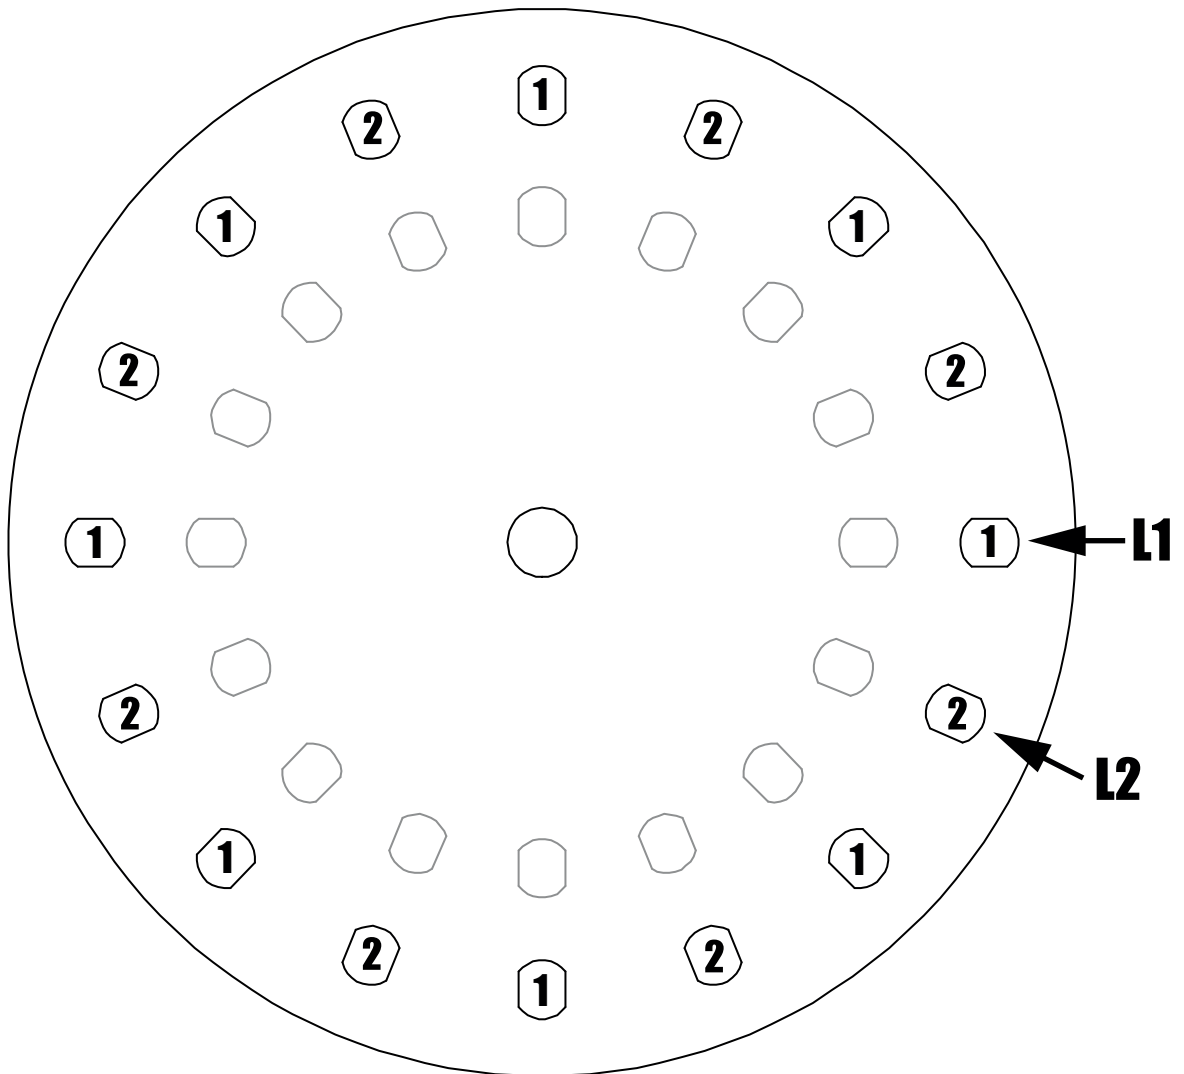

Arm **L1**

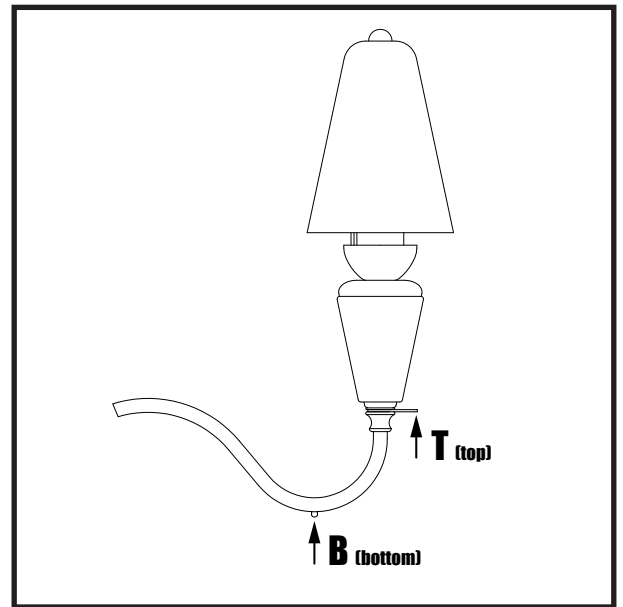

Size "L" 16L

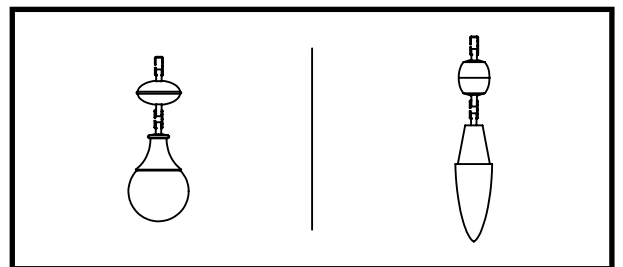

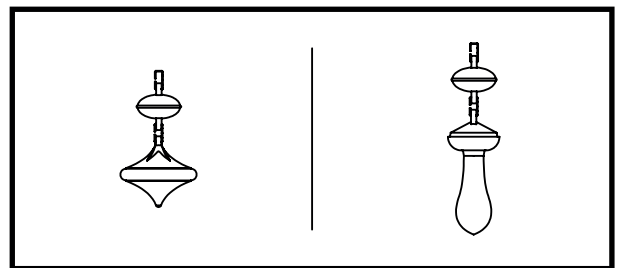

Each box is labeled with the arm size it contains.

Once the box is opened, first install the arm, then hang the accesories belonging to it, according to the table below:
